## About us

We are synonymous with attention to details and continuous research. Founded in 1981 by Raimondo Mattiuzzo, today Raxyline is the leading manufacturer Italian promotional merchandising printed on fabric. We help companies with a presence throughout Europe to enhance their brand, increase their visibility and to be competitive in their target market. From idea to design, from production to packaging: all processes are carried out in Italy, in Treviso. "True Made in Italy".

## Our objective?

Our main clients are marketing agencies: for years we have been giving life to projects, transforming them into products set apart by their high quality, creativity and artistic innovation. Our goal is to improve our clients' competitiveness in their market of reference, proposing ever-new and original creations and products.

## Your needs?

For advice, or simple curiosity, do not hesitate to contact us, we will be more than happy to analyze problems together and find solutions to make your ideas a reality.

## We package while respecting the environment

Proposing packaged products means ensuring a series of benefits (or services):

**-Product protection:** from impacts, contact with other external objects, but also contamination by chemical-physical agents such as water, moisture, air - in order to maintain the product's qualities unchanged.

**-Product presentation:** a customized package with the brand logo, materials, shape, and specifically designed dimensions highlights the product itself and the brand, making it more recognizable.

**-Product communication:** the packaging can be customized to instruct the consumer on the use of the product.

For packaging, we have chosen eco-friendly materials such as recycled paper with FSC certification or 100% recycled PE-LD plastic material. For our shipments, we use FSC-certified recycled cardboard boxes and paper tape: this way, you can reuse the box or recycle it without separating the materials.

# Processing Third-party Materials

We intervene on the fabrics and materials of our clients by carrying out sublimation and screen printing processes.

We also provide pad printing, laser engraving, cutting, and sewing services. We will carefully listen to your needs to create on your materials whatever you require.

# Screen Printing

Screen printing is among the oldest printing techniques. The image to be printed is engraved on a support (frame or cylinder) which is fixed to the printing machine. The ink is pushed onto the support and permeates through its engravings, transferring onto the fabric, imprinting the desired image. This technique allows for thick and three-dimensional prints. Special effects can be created using opaque, glossy, metallic, luminescent, or silicone-based inks.

We provide promotional products based on cotton, felt, hemp, paper, and more.
